## about us

Established in the year of 2003, we Micropure Healthcare Technologies are one of an ISO 9001:2015 Certified organization engaged in manufacturing and supplying a wide range of water Treatment System and its associated Accessories, Our range includes commercial RO system, industrial RO System and Domestic RO systems.

Designed in compliance with the pollution control board standards, these systems can easily conduct ultra violet treatment, brominating, iodination and radial flow iron reduction for intensive biological treatment of water. Our custom- made range is known for its trouble free performance hence is extensively used in residential as well as commercial sectors.

Apart from this, we also render installation and after sales service to our clients, To manufacture our range and render these service, we are supported by a well developed infrastructure. At our infrastructure, we have developed separate manufacturing, quality testing, R&D and in-house unit. At the units, we have installed latest CAD/CAM software and high-tech machines that allow us to offer customization facilities to our clients at highly affordable prices.

Under the able guidance of our CEO, Mr. Rajeev Mittal, we are able to carve a niche for ourselves in this competitive environment. It is because of this help and support that we are able to successfully deliver solutions as per the exact requirement of our clients.
